Product Brief

Ergotech Introduces "Convertible" Monitor Arm for Fast, Easy Expansion from Single to Dual Display

Citing fast growing workplace demand for dual-screen computer displays, Ergotech Group, Inc., a leading designer and manufacturer of multi-screen mounting solutions for flat panel monitors, has introduced the "Convertible," a sleek, sturdy articulating arm designed for supporting single or dual flat panel monitors. The "Convertible" allows users, quickly and without tools, to easily expand from single to dual monitor display and to position screens horizontally or vertically. Ergotech's exclusive multi-adjustment quick release pivot and improved cable management system allows for fast mounting or removal of screens while enabling precise positioning of monitors for optimum viewing angle and comfort.

"Flat panel displays are making dual and multi-monitor configurations more practical and more popular, especially in areas like graphic design, publishing, engineering, and of course finance," said Ergotech President and Founder Chris Malisse. "The Convertible offers many of the admired features we developed for the financial industry, the most demanding environment for multi-screen monitor displays. We've created a product with a very contemporary design that is both strong and durable. It can be easily adjusted for users' maximum comfort and productivity."

A flexible and ergonomic monitor mounting solution, the "Convertible" can be securely attached to virtually any desk or wall without tools using Ergotech supplied hardware. The expanding arm, which can extend to hold multiple monitors up to 25 lbs., on each mounting pivot, folds back and nests flush, saving valuable office space. The Convertible features Ergotech's new cable management system with cable clips which are more durable, easier to use and more effective in keeping cables in place.

The suggested retail price for Ergotech's "Convertible" is \$335. Available in black or silver, the "Convertible" is backed by Ergotech's limited lifetime warranty.

About Ergotech Group, Inc.

Founded in 2000, Ergotech Group, Inc. is the leader in multi-screen flat panel monitor mounts used at trading desks globally throughout the financial services industry and other areas where flat-panel mounting solutions are used, including command and control centers, operations and call centers, medical monitoring stations and corporate offices. The company's product line includes desk stand monitor solutions, single and dual monitor solutions and large multi-screen solutions for mounting up to 15 screens. The company's headquarters in the United States is at 8 Westchester Plaza, Elmsford, NY 10523 (**914-347-3800**). Ergotech Group's headquarters in London is at St. John's House, 54 St. John's Square, London, EC1V 4JL (**+44 (0) 207 043 8118**). The company's website is www.ergotechgroup.com.
